

PRESIDENT'S MESSAGE

Another month has gone by and coming up is the May Sale. I have Inventory Sheets if you need them.

Don Jordan will tell you about when and what time you need to have your items at the sale.

Larry Dorrell is in charge of this sale as to set up, etc.

Let's hope this sale is a good one.

Fred

SECRETARY REPORT

Next meeting of Prescott area wood turners will be on May 3rd at Mountain Artist Guild. Times are 1pm to 4pm.

May 10 and May 11 will be the sale on the court house lawn. The times for the sale are 9am to 5pm on Saturday and 9am to 4pm on Sunday.

Those who are planning to help set up on Friday night should be at the area by 5 P.M. We will need to carry items from the East side of the court house to our area as we will not be able to unload from normal parking spaces. I have six on my list who offered to help and I will confirm with each before May 10th. Those who are selling should follow the guide lines as provided by Don Jordan which is stated below.

If you plan to sell your turned pieces have them at our booth by 8am on Saturday May 10. Please have all priced, tagged and coded with your initials. All items must be entered on our inventory sheets. We are going to try to make room for everyone who wishes to sell and therefore we will not put any pieces on display until everyone has checked in. Please be there no later than 8am. It would be helpful if after you display your items you plan to stay at our booth and help sell. It looks as if it will be a great weekend so good luck on your items.

Thanks to those who helped at the Fire Wise display on Saturday the 19th of April. Tony stepped in at the last minute to get things going as W had to be out of town. I know that Ken and Jim helped turn and Jim had his very I lathe there also. Thanks to all who helped to support our club.

At our meeting on April 12, Roger Harlow did a great job on segment turning. I don't know why things always look so easy when someone else does it. Roger made it look easy to cut the pieces at the correct angle and glue them up. I have always wanted to try my hand at segment turning but I have never made the effort as it looked too difficult. Thanks to Roger's demonstration I may get the nerve to try it. Thanks Roger for a great job, you surprised all of us with your talent.
